# UV-3092

UV/VIS Spectrophotometer

## Features

### Excellent Performance

A high-performance double beam spectrophotometer with a variable spectral bandwidth from 0.05 - 5nm, selected by a continuous changeable slit. The Czerny-Turner mounting with a holographic grating keeps stray to a minimum and offers excellent optical resolution. The use of photomultipliers as detectors offer exceptional sensitivity.

### Very Stable Baseline

The true double-beam optical array coupled with an efficient and well proven electronic control system ensures high stability and low background noise.

### High Resolution

The double beam optical design coupled with a high specification holographic grating gives excellent wavelength separation and allows the users to examine wavelength that are very close whilst providing excellent ratio to background noise.

### Accurate Wavelength

The automatic wavelength control system and the automatic light sensors ensure wavelength accuracy and high performance of the instrument.

### Easy Accessories Replacement

The modular structure of the sample compartment enables the easy use of wide range of optical accessories and accurate analysis of various sample types.

### User-friendly Service Ability

The user friendly design of the light source chamber for the deuterium lamp and tungsten halogen lamp allows easy light source replacement and simplified routine maintenance.

### Versatile Application Software

The UVWIN user friendly operating software operating on a Windows platform offers many operational and data processing capabilities, thus presenting the user with a very versatile simple to use spectrophotometer system.

### The Key Components

All the components used in the UV-3092 are selected for their reliability and continued high performance.
